

## Mobility Management

Mobility Management involves making the most efficient use of all available resources to improve mobility and reduce costs. Within the nine-county Centralina region, a variety of services are available, both national and local, scheduled fixed-routes and trips by-request, fee-based services and free services made possible often through the help of volunteers.

**Rail Service** in the region is currently limited to AMTRAK and the Charlotte Blue Line light rail.

**Fixed Route Bus Services** serve Kannapolis, Concord, Salisbury, Gastonia, and Mecklenburg County. Route schedules and ticket sales are usually available online or by phone, or at transit centers.

**Para-transit Services** (or "dial-a-ride") are available in every county of the region. They serve the elderly, disabled, or veterans for medical appointments and social services.
